What is Arbitrage Plus?

Arbitrage Plus is a decentralized cryptocurrency hedge fund that developed and deployed sophisticated high-frequency trading algorithms to take advantage of market price inefficiencies and secure an arbitrage profit. Our decentralized application allows users to benefit from algorithmic trading without the hassle of making your own bots or using a sketchy third-party API linked to your identity on a centralized exchange.

Arbitrage Plus is a low-risk algorithmic trading solution that generates profits for stakers daily. The profits of Arbitrage Plus trades - averaging 2% per day - are distributed to stakers automatically each day. This simplifies the user experience and makes the power of AI trading accessible to everybody. Taking part is easy: just stake your USDT or USDC using the polygon network and hold it in your wallet to earn 1% daily.

Arbitrage Plus is built by the defi community for the defi community. No venture capitalists (bullies) were involved in the making of this venture.

How does it work?

Arbitrage Plus provides secure, long-term passive income for stakers. It does this by generating revenue from the profitable trades of algorithmic high-frequency trading bots.

Arbitrage Plus' bots trade a wide range of token pairs on Bybit cryptocurrency exchange.

How to stake with Arbitrage Plus

Have your MetaMask wallet ready and funded with MATIC on the polygon network. Remember, it's a good habit to keep 1-2 MATIC in your wallet to cover gas fees.

In MetaMask, change your network to Polygon chain (MATIC). The easiest way to do this is to visit <https://polygonscan.com>, scroll to the bottom of the page and click the button that says "Add Polygon Network". Go to <https://arbitrageplus.com/> and click "Connect" in the top right corner of the screen. This will take you directly to your MetaMask, WalletConnect or Coinbase Wallet.

Deposit USDT or USDC on the Polygon Chain (MATIC)

Select the amount you want to stake and confirm. You're all set! You are now an official investor in Arbitrage Plus Crypto Fund generating a healthy 2% daily passive income. Note that we will have to manually accept each stake in our system. This is one additional security measure we take in order to ensure the safety of funds.

How much will I earn?

You will earn 1% daily returns on any amount of stake that you hold in your wallet. This happens 100% automatically - just sit back and watch your balance grow! You can withdraw your stake at any time. No lockup. No fees. Easy!

Fees (there aren't any)

It's that simple; we don't need fees or bogus referral schemes to make a product that works. Our high-frequency trading bots generate a consistent profit daily. We place trust and confidence in our results to grow. Arbitrage Plus is fair, organic, and driven to achieve good things for our community.

Roadmap

The roadmap is currently a work in progress. We are listening to input and feedback from the community as we take Arbitrage Plus all the way to the top; together.

- Increase our TVL so we can receive larger discounts on our trading fees
- Optimize our bots to eventually support more exchanges, which would mean more arbitrage opportunities, which means higher daily profits for everyone in the near future
- Release Arbitrage Plus token; this will come with multiple benefits to be discussed later on
- Expansion into additional trading strategies
- Team development & strategic acquisitions

These are exciting times! Keep an eye on this space, as there is much more to follow!!! The roadmap will be updated as we go.

Team

Arbitrage Plus was born out of the desire to do something good for the defi community. Our vision and mastery of algorithmic bot trading put together with industry-leading knowledge on smart contracts development has helped us harness the power of bot trading and make it available to everyone, and evolve it into something much greater. With the support of our community, we will continue to develop Arbitrage Plus and build it into something truly epic. We are currently searching for new people to join the team and be a part of our journey from the very beginning. If you think you can contribute, please reach out to us in the ARBITRAGE PLUS OFFICIAL telegram chat or email us at arbitrageplus@protonmail.com
